

Papur Prysur Blwyddyn 5

Aethon ni ar drip i draeth Freshwater West gyda'r Darwin Centre ac roedd hi'n ddiwrnod gwych. Fe wnaethon ni gasglu dros 20kg o sbwriel o'r traeth, ac roedd yn sioc gweld faint oedd yno. Pan ddychwelon ni i'r ysgol, fe gawson ni gyfle i ddefnyddio'r microsgopau i edrych ar y micro blastigau a gasglwyd.

Wnaethom ni fwynhau creu darn o gelf oedd yn cysylltu â'n thema dosbarth y tymor hwn, sef Llygredd. Fe wnaethom ni greu llun oedd yn dangos dau amgylchedd gwahanol, un oedd yn lân ac yn gynaliadwy, a'r llall yn llawn sbwriel ac wedi'i lygru. Roedd yn ddiddorol gweld y gwahaniaeth mawr rhwng y ddau ochr!

Yn ystod sesiynau Gwener Gwych yr hanner tymor yma, rydym ni wedi bod yn gwneud pob math o weithgareddau hwyliog yn y goedwig. Buom ni'n adeiladu cuddfannau yn defnyddio tarpolin a rhwydi, creu celf allan o ddeunyddiau naturiol, chwarae yn y gegin fwd, a gwneud darn o gelf gan ddefnyddio dail a morthwyl, gelwir hyn hapazome.

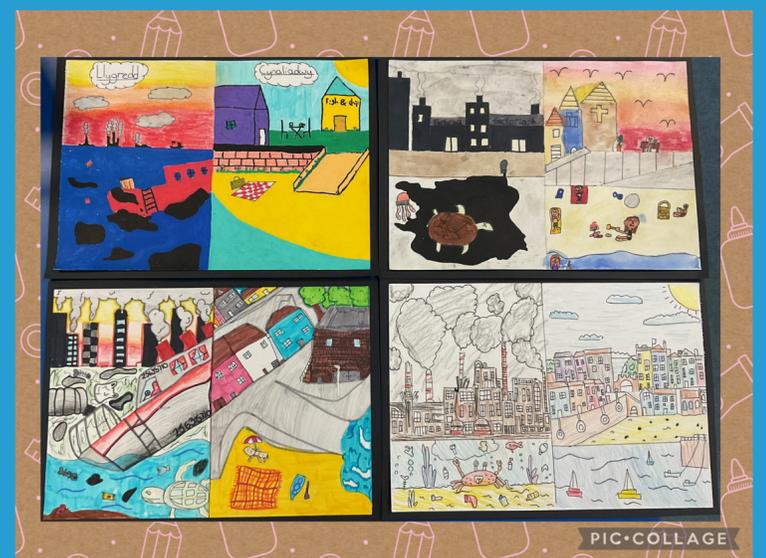

Year 5

Papur Prysur

We went on a trip to Freshwater West beach with the Darwin Centre, and it was a great day. We collected over 20kg of rubbish from the beach, and it was shocking to see how much there was. When we returned to school, we had the chance to use the microscopes to look at the microplastics we had collected.

We enjoyed creating a piece of art that linked to our class theme for this term, which is pollution. We created a picture showing two different environments: one that was clean and sustainable, and the other full of rubbish and polluted. It was interesting to see the big difference between the two sides!

During this half term's Fantastic Friday sessions, we have been doing all sorts of fun activities in the forest. We have built dens using tarpaulins and nets, created art out of natural materials, played in the mud kitchen, and made a piece of art using leaves and a hammer – this is called hapa zome.
